Professional Summary

Software Developer with experience in full-stack development and a strong focus on secure system design. Background in banking systems development and currently advancing expertise in Cyber Security in Australia. Skilled in building scalable applications using modern technologies, with hands-on experience in backend architecture, frontend development, and security-focused environments.

Technical Skills

Languages: JavaScript, TypeScript, PHP

Frameworks: React.js, Node.js

Databases: MongoDB, MySQL

Cloud & Tools: AWS (IAM, KMS), Git, Linux (Kali)

Cyber Security: Nmap, Wireshark, MFA, IAM, Network Analysis

Professional Experience

Software Developer – HGV Sistemas (Brazil) | Mar 2020 – Feb 2024

- Developed and maintained banking systems for financial institutions including Sicredi and Sicoob
- Worked with MVC architecture using PHP, JavaScript, SQL, HTML, and CSS
- Implemented system improvements and bug fixes in production environments
- Collaborated with cross-functional teams to deliver secure and reliable financial solutions

Projects

Orbit Planner (AI-Powered Fullstack Platform)

- Developed an AI-powered productivity and life planning platform using React, Node.js, Express, and MongoDB
- Integrated conversational AI features to provide personalized recommendations and user assistance
- Implemented Cloudinary cloud storage for image management and optimization
- Designed scalable MVC architecture with secure API communication
- Built timeline, scheduling, and dashboard modules to support daily planning and goal tracking
- Created responsive and modern user experiences across desktop and mobile devices

Schedule System (Fullstack)

- Fullstack scheduling system built with React, Node.js, and MongoDB
- Implemented MVC architecture with RESTful API integration
- Designed backend logic and database structure using Mongoose
- Developed responsive frontend with user interaction flows

Portfolio Website (Frontend)

- Developed personal portfolio using React and Material UI
- Implemented responsive design and modern UI/UX principles
- Integrated project showcase and navigation system

Library Movies (React + API)

- Developed a movie discovery application using React.js and external REST APIs
- Implemented search, filtering, and detailed movie information features
- Integrated API consumption with asynchronous data handling and error management
- Built responsive user interface with modern React development practices

Education

Advanced Diploma of Information Technology (Cyber Security)

NVR Education Australia – Sydney (2024 – Present)

Bachelor of Foreign Trade (International Business)

UPF University of Passo Fundo – Brazil (Completed)

Additional Information

Portuguese (Native), English (Advanced)

Experience working with real-world financial systems
