## Professional Summary

Passionate Full-Stack Developer with 4 years of experience building web applications using PHP, JavaScript, and React.js. Recently transitioned to Australia to expand my expertise in Cyber Security, with hands-on knowledge in Kali Linux, AWS IAM, MFA, and KMS. Experienced in working with banking systems, following secure coding practices, and continuously improving through online courses and practical labs. Actively seeking opportunities to contribute in both development and security-focused roles within collaborative and growth-oriented teams.

## Technical Skills

🔧 Development:
- PHP, JavaScript, TypeScript, React.js, HTML, CSS, Node.js
- SQL, MySQL, MongoDB, Firebase

☁️ Cloud & Tools:
- AWS (IAM, KMS, MFA), Git, GitHub, Figma, WordPress, SEO

🔐 Cyber Security:
- Kali Linux, Metasploitable, Nmap, Metasploit
- Ethical Hacking fundamentals, MFA implementation

🧱 Architecture:
- MVC Pattern, REST APIs, Responsive Design

## Professional Experience

HGV Sistemas – Software Developer
Tapejara, Brazil | Mar 2020 – Feb 2024
• Developed and maintained banking systems for clients like Sicredi and Sicoob

• Applied secure coding principles using PHP, JavaScript, MVC, and MySQL
• Implemented responsive web interfaces and optimized database queries

## Education

Diploma in Cyber Security – NVR Education Australia
Sydney, NSW | 2024 – Ongoing

Bachelor's Degree in International Business – UPF University of Passo Fundo
Brazil | Completed

## Projects

Banking System Credito – Sicredi (2023)
Internal PHP-based system with secure login, data management, and role-based access.
Tech: PHP, MVC, SQL, CSS, HTML, JS

AWS IAM Security Lab (2024)
Created IAM user roles, implemented MFA, and configured encryption with KMS.
Tools: AWS Console, CloudTrail, CLI

Kali Linux Pentest Simulation (2024)
Performed simulated reconnaissance and exploitation using Nmap and Metasploit in a local lab environment.
Tools: Kali, Metasploitable
